NOTICE
for the consumers and business associates

The damage caused by plagiarism of industrial products and their design is present in all parts of the world today. It is estimated that more than 10% of all products on the planet are counterfeits and plagiarism. The situation is similar with our product (Flex Natural Cleaner), because attempts to plagiarize versions of Flex can be found on the market. After laboratory tests, it was easily determined that such products are not completely natural and do not remove all types of stains, which is a unique feature of Flex. Counterfeits of our product mislead consumers and distributors. It is just a cheap scam by unfair competition. The Flex product is completely natural, it is not harmful to people and the environment, it has won several different recognitions and awards, and its trademark is protected as Intellectual Property. That is why we warn everyone who tries to harm our brand, whether it is an attempt to copy an idea, recipe or design, we will be forced to protect our legal rights. Our legal team is already preparing measures against individuals and companies who have tried to harm the Flex brand with counterfeit products. We ask all consumers and distributors to read product declarations carefully. The original recipe of the Flex product is owned exclusively by our company Natural Health Group doo, which is the only one that can guarantee that our product will not damage the fabric and the health of the users.
